SUMMARY

Generative AI Engineer with 3+ years building production-grade AI systems — RAG pipelines, multi-agent architectures, document intelligence platforms, and vision models deployed at enterprise scale. Specialized in LLM orchestration, agentic system design, and translating complex engineering problems into reliable, measurable AI products.

WORK EXPERIENCE

Generative AI Engineer — Visteon Corporation

September 2025 – Present

- Architected a full-stack **agentic document intelligence platform** using **React + TypeScript, FastAPI, Milvus, and GPT-5 mini** to ingest and classify multi-format OEM automotive documents (PDF, DOCX, XLSX, scanned) from SharePoint, reducing hardware requirement search and traceability from days to seconds for engineering teams.
- Built a **5-stage classification pipeline** (keyword scan → filename inference → Milvus embedding similarity → visual diagram detection → LLM contextual reasoning) using **Python and GPT-5 mini** to auto-categorize requirements with high confidence, eliminating manual classification for downstream AI agents.
- Built a **requirements standardization layer** with **LLMs and vector search (Milvus)** performing semantic deduplication, cross-document conflict resolution, and OEM terminology normalization, producing structured ground truth that feeds MPN recommendation and architecture diagram generation agents.
- Shipped an **LLM auto-evaluation pipeline and user feedback loop** using **FastAPI and GPT-5 mini** to continuously measure and improve extraction quality across evolving document formats without manual re-annotation.
- Fine-tuned a **Donut** (Document Understanding Transformer) model with **PyTorch and Hugging Face** for structured field extraction across **10,000+ daily invoice PDFs**; built confidence-score validation with human-in-the-loop fallback to handle 50+ vendor layouts in automotive supply chain operations.
- Built a **YOLO + OpenCV** detection engine using **Python and FastAPI** to replace legacy logos across DOCX, PPTX, and PDF files with layout-safe bounding box alignment — boosting document processing productivity by **90%** and eliminating manual overnight batch work.
- Architected a **React + FastAPI** report automation platform with custom **SQL Server and Oracle DB** connection pooling, log/CSV aggregation APIs, and DOCX auto-population — cutting end-to-end report turnaround by **240×**.

Software Engineer II — MAQ Software

March 2025 – September 2025

- Built **FastAPI** microservices and orchestrated an **AI-driven multi-agent analytics framework** using **LangGraph** — SQL/DAX generator, evaluator, and metadata enricher agents — integrated with **Power BI and SQL Lakehouse** to automate data-to-insight delivery for enterprise analytics teams.
- Conducted automated **LLM evaluation** using **DeepEval** to benchmark the custom agent framework against **Power BI Copilot** across groundedness, accuracy, and relevancy metrics — demonstrating superior performance of the in-house solution across all three dimensions.

Software Engineer I — MAQ Software

August 2023 – March 2025

- Led backend development of a **RAG-based AI chatbot** serving **80K+ users** using **Python, vector search, and optimized prompt pipelines** — achieving **90% retrieval accuracy** and **95% Responsible AI compliance** across enterprise knowledge bases.
- Built scalable **Spark** data pipelines for high-volume document ingestion and deployed containerized inference services with **Docker** across multi-region infrastructure to reduce latency and improve availability.

TECHNICAL SKILLS

Languages	Python, JavaScript/TypeScript, SQL
AI & ML	LLMs, RAG, Multi-Agent Systems, Donut, YOLO, OpenCV, Milvus, Hugging Face
Frameworks	FastAPI, React, Spark, LangChain, LangGraph, DeepEval
Cloud & DevOps	Azure, Docker, CI/CD, Databricks, Snowflake

EDUCATION

B.Tech in Information Technology

International Institute of Information Technology, Bhubaneswar

2019 – 2023

GPA: 7.72

CERTIFICATIONS & ACHIEVEMENTS

Microsoft	Azure Developer Associate · Azure AI Engineer Associate
Databricks	Certified Data Engineer Associate
Competitive	LeetCode Knight — Rated 1972, Top 3% globally · 1500+ problems solved
